VOXX Electronics Corporation Wins CES 2018 Innovation Award for LOOK-IT, a Revolutionary Wireless Back-Up Camera

ORLANDO, FL. – JANUARY 8, 2018 – LVCC, CENTRAL HALL BOOTH 13518 - [VOXX Electronics Corporation \(VEC\)](#), a wholly-owned subsidiary of [VOXX International Corporation](#) (NASDAQ: VOXX), announced today that it has been named a CES 2018 Innovation Awards Honoree for its new revolutionary wireless back-up camera, LOOK-IT™. Products entered in this prestigious program are judged by a preeminent panel of independent industrial designers, independent engineers and members of the trade media to honor outstanding design and engineering in cutting-edge consumer electronics products across 28 product categories.

LOOK-IT, powered by Lightwave Technology, takes backup camera technology to the next level by combining wireless smartphone technology with a high-tech built-in license frame camera, providing

users with a do-it-yourself, all-in-one backup camera and monitor solution. With safety and convenience in mind, LOOK-IT will help improve back-up safety, reduce blind spots and assist in changing the way drivers park their vehicles. The system connects wirelessly to a smartphone and turns an iPhone or Android device into the display, allowing drivers to view the footage directly on their smartphone. The camera provides smart grid line calibration for better back-up maneuvers and can be adjusted with various camera angles to fit any vehicle's size. The IP67 certified 1-piece waterproof molded design license plate frame includes a built-in camera and

houses a replaceable battery that can power the camera for up to four years. Since the camera communicates with the smartphone over a wireless connection, there's no need to connect wires to the vehicle.

To activate the system, the user presses a button on the QuickView patent-pending remote mounted on the steering wheel or dashboard, and instantly unlocks and opens the app displaying the image. Allowing the user to focus and keep their eyes on the road ahead, the QuickView remote comes with two auxiliary buttons that are programmed to launch Google Map and Apple map. In the short future, users will be able to launch their preferred APPS.

“LOOK-IT takes back-up camera technology to the next level by combining wireless smartphone technology with a high-tech camera that anyone can install. The LOOK-IT device can instantly turn any iPhone or Android device into a backup camera that connects wirelessly. With consumer awareness for in vehicle safety products at an all-time high, coupled with both a DIY or hardwired application, we feel this product is ideal for all distribution channels,” said Aron Demers, Senior Vice President, VOXX Electronics Corporation. “VOXX remains dedicated to delivering safety accessories to the aftermarket and continuing to grow the Advanced Driver Assistance System category. With the introduction of LOOK-IT we can offer drivers an affordable and easy solution to upgrade their vehicle to include these new features, without the need to replace their rear-view mirror or existing radio.”

The prestigious CES Innovation Awards are sponsored by the Consumer Technology Association (CTA)[™], the owner and producer of CES 2018, the global gathering place for all who thrive on the business of consumer technologies, and have been recognizing achievements in product design and engineering since 1976.

VOXX’s LOOK-IT will be displayed in the VOXX International Corporation Booth #13518, in the Central Hall at CES 2018, which runs January 9-12, 2018, in Las Vegas, Nevada.

Entries are evaluated on their engineering, aesthetic and design qualities, intended use/function and user value, unique/novel features present and how the design and innovation of the product directly compares to other products in the marketplace.

Products chosen as CES Innovation Honorees reflect innovative design and engineering in some of the most cutting-edge tech products and services coming to market.

CES 2018 Innovation Honoree products are featured on CES.tech/Innovation, which lists product categories, as well as each product name, manufacturer information, description, photo and URL.
